# Building High-Value Health Systems through AI

- What to expect during the Hackathon ?

- What to expect after the hackathon as a winning team ?

- Who can participate ?

**We are seeking enthusiastic students, postdocs, and young professionals who are passionate about innovation, and leveraging AI health solutions.**

# Building High-Value Health Systems through AI

- What is the criteria for team formation and recommended team size ?

**Our Hackathon is designed to support early-stage innovations, fostering an environment where individuals and teams can develop and refine their ideas. While mature innovations are welcome, the focus is on early-stage development.**

**We recommend forming diverse teams of 3-5 members to enhance the innovation process. Participants can join as individuals, teams, or early-stage startups, working on either non-profit or for-profit ventures.**

- Do teams need to prepare a prototype for presentation ?

**There is no requirement for teams to present fully working prototypes during the pitches. Concept-stage ideas are welcome, and we're open to creative presentation methods. The key is for teams to convey a clear understanding of how their prototype would function.**

- How do I join as a team as an individual ?

**Once applicants are accepted into the Hackathon, they can join a Zoom Q&A session, held by their local Hub two weeks before the event. Additionally, Slack groups will be set up for each Hub. Teams can be formed on Slack before the Hackathon begins or on the first day of the event.**
